

Wave Plus Company

UI/UX Design Sample Attachment

Project Overview

Wave Plus Company is looking for a UI/UX Designer to create a modern, responsive, and user-friendly digital experience for a company website or web application. The design should be clean, professional, visually consistent, and easy to navigate.

Design Requirements

Area	Requirement
Visual Style	Modern, clean, professional, minimal interface
Responsive Design	Desktop, tablet, and mobile layouts
Color & Typography	Consistent color palette, readable typography, clear hierarchy
Navigation	Simple and intuitive navigation with clear user flows
Components	Buttons, forms, cards, tables, alerts, modals, and navigation states
Accessibility	Good contrast, readable text, clear interaction states
Prototype	Clickable prototype for the main user journeys

Expected Deliverables

- High-fidelity UI designs for the agreed screens.
- Responsive desktop and mobile versions.
- Reusable UI component/design system.
- Clickable prototype covering the primary user flow.
- Design source file (Figma or equivalent).
- Exported assets where required.

Suggested Screens

- Homepage / Landing Page
- Login / Sign Up
- Dashboard
- Profile
- Search / Listing
- Detail Page
- Form / Create Page

- Notifications

Design Goal

Create a polished experience that feels trustworthy and professional while keeping the interface simple enough for first-time users to understand quickly.

Sample attachment prepared for the Wave Plus Company UI/UX Design project.
